SECURITY AND COMMUNICATIONS SYSTEMS

PROVIDING TOMORROW'S TECHNOLOGY TODAY

www.datatalknz.com ph. +64 6 7699 123

Director's Message | Peter Lind

It's simple really. Quality is remembered long after the price is forgotten.

Our loyal customers keep coming back to us because we provide a hassle free service. The people we deal with do not want any additional issues to deal with as they already have enough to do on a daily basis, when clients order a system from DataTalk they simply want it to work.

We are all very passionate about what we do and enjoy the challenge of providing innovative and cost effective solutions that utilises modern technology.

Our clients just want the job done properly.

Who is DataTalk? | For more information please phone us: +64 6 7699 123

DataTalk commenced business in August 2002.

The company consists of a team of people that are focused on providing the very best of service and equipment.

We have the resources in house to ensure that any project can be completed on time and within budget.

We would like to be considered as more than a mere Service Company. We want to be your preferred partner.

Our corporate culture of open discussion within DataTalk and your organisation and, above all, with you - is the basis for creating the best possible solutions. We give top priority to carrying out installations to the highest possible standards with no compromise for quality.

The team effort and achievement has been recognised with business awards such as the 2003 Westpac-Trust Taranaki Emerging Business of the Year and a Service Award in 2007.

Why DataTalk?

“Anyone can throw in a system. The smart trick is to optimise the performance with clever design and to build a system that can be scaled to meet future requirements without having to throw away expensive equipment further down the road”

Organisations choose DataTalk because they want...

- A solution that will meet the needs of their organisation for today and tomorrow.
- To benefit from DataTalk’s expertise and knowledge about security / communication systems.

- To have a complete, integrated solution that exploits the advantages of network technology.
- To be able to upgrade their solutions progressively as new innovative systems and products are developed.
- To work with a company that has a strong regard for Health and Safety.
- To do business with dedicated people who provide solutions that work.

Besides all of the above, what organisations really want is.....Peace of mind.
